Claims 18-21,23-26 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 17, 2008.

Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 10, there is no definite antecedent basis for "said air inlet opening".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-17 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Bargheer et al ('399).

Figure 4 shows structure as claimed, including a backrest 46, a headrest cushion 12 and an air vent 30 therebetween. Note that a heater 32 is arranged within the duct, and a blower may also be provided therein (col. 3, lines 30-32) The backrest includes an "extension" which lies behind the headrest cushion.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hellig, Saito et al, Odebrecht et al, and Bargheer et al ('785) show various features of the invention.
